**ABSTRAK**

Diperlukan adanya pengendalian terhadap pengisian dokumen rekam medis sebagai syarat penangguhan biaya klaim asuransi dan juga sebagai syarat akreditasi. Di RSUD Brebes. Kegiatan pengendalian dokumen rekam medis ini seharusnya dilakukan oleh bagian assembling, tetapi di RSUD Brebes tidak diterapkan adanya assembling. Kegiatan assembling di RSUD Brebes pada kenyataannya belum diterapkan, namun kegiatan tersebut tercantum pada Standar Operasional Prosedur (SOP) rumah sakit. Akibatnya dari 10 DRM yang dijadikan sample, 80% DRM pada formulir RM.11 (Resume Keluar) pengisiannya belum lengkap. Penelitian ini bertujuan untuk mengetahui pengetahuan dokter rawat inap dalam pengisian formulir RM.11. Penelitian ini menggunakan penelitian deskriptif dengan metode observasi dan pendekatan cross-sectional. Total sampel sebanyak 16 dokter rawat inap menggunakan angket.

Berdasarkan hasil penelitian didapatkan sebagian besar dokter berumur 30-39 tahun (43,75%), berpendidikan S2 Kedokteran Spesialis (75%) dan S1 Kedokteran (25%) serta dengan masa kerja 0-5 tahun (43,75%). Tingkat pengetahuan dokter yang masih kurang, hal ini di buktikan dari responden belum mampu menjelaskan secara tepat dan menjabarkan alasan mengapa formulir tersebut harus terisi secara lengkap. Pengetahuan responden pada tingkat memahami masih kurang, sehingga perlu adanya penjelasan dalam bentuk sosialisasi yang tertulis dalam protap mengenai pentingnya dari kelengkapan pengisian RM.11(Resume Keluar).

**ABSTRACT**

It is necessary to conduct a control activity toward the completion of medical record document as the requirement for the postponement of insurance claim fee and also as the requirement of accreditation in RSUD Brebes. This activity to control medical record document should be done by the assembling division, but assembling division is not applied in RSUD Brebes. The activity of assembling has not been actually applied there. However, this activity is included in the Standard Operational Procedure (SOP) of the hospital. As a result, from 10 DRM, there are 80 % of DRM on the RM. 11 Form (Out Resume) whose completion is not complete. The objective of this research is to find out the knowledge of the inpatient doctors in the completion of RM.11 Form.

This study uses a descriptive method using an observative method and cross-sectionanl approach. There are 16 inpatient doctors to be the samples who fulfilled the questionnaire of this research.

Based on the research's result, it is shown that most of the doctors are around 30-39 years old (43.75%), having an S2 degree of specialist doctor (75%), having an S1 degree of doctor (25%), and the time of service from 0-5 years (43.75%). The doctor's level of knowledge is considered low. This can be proven from the fact that the respondents can not explain the form correctly and and they also can not describe why that form must be fulfilled completely.

The conclusion of this study is that the knowledge of the respondents in understanding the importance of Form RM. 11 is considered low so that it is necessary to give an explanation in the form of written socialization as what is written in the Standard Operating Procedure related to the importance of the completion of form RM 11 Fulfillment (Out Resume).
